STRIX 2

BEYOND IMAGINATION

Strix 2 is a **state-of-the-art** product developed by former Intelligence (TSU) engineers.

The Strix phone can work in two modes:

- As a server (Web UI, RTSP, ONVIF)
- As a client to the server (Strix Elite 2, SRT, RTMP)

Key Advantages:

- The smallest pinhole camera on the market
- Unnoticeable difference compared to unmodified phones
- High quality SMD electronic modifications
- Tailor-made covert surveillance software
- Remote control and live stream
- GPS integration with 3rd party systems
- SMS remote control
- Support for 3rd party USB cameras
- Black screen recording
- High quality H.264 video recording
- Hidden preview with adjustable transparency
- **High Dynamic Range - microphone mod** (available exclusively on Strix 2 - S21)
Up to **400%** microphone fidelity improvement
It can outperform the most sensitive audio bugs

Software updates and license

- Lifetime free software updates
- Permanent software license
- 2 year hardware warranty
